

COPPER CARE HIGH RISK MATTRESS

- 10 Year Guarantee
- Weight Rated To 350KG
- 25cm Thickness
- Clinically supported by Pressure Mapping evidence for each client

The Copper Care mattress is a 'High Risk Multi Layered Pressure Care Mattress', it is designed to reduce the risk of pressure ulcers and pressure sores.

The castellated copper top surface creates multiple contact points which helps to maximise pressure redistribution and further reduce the risk of pressure and skin shear.

The Copper Care has an advanced Heel baffling system that provides a surface that enhances the care of the client and further manages the risk of pressure in the sensitive ulcer prone heel area.

Customer Review:

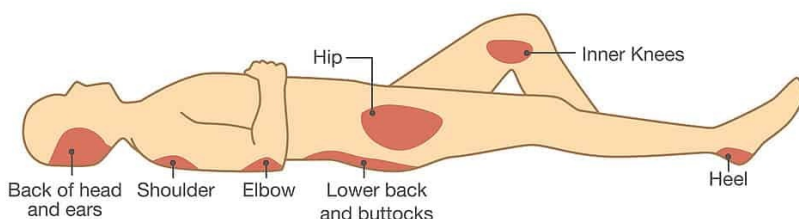

"Perfect for self transfer"

"The copper technology takes the heat away from my body"

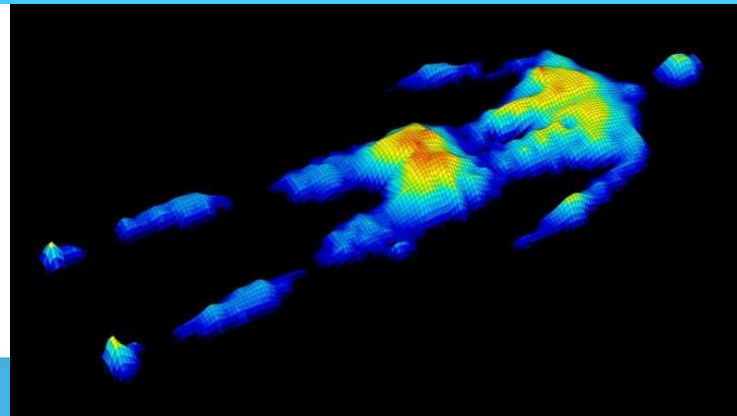

"Finally a pressure care mattress that is comfortable".

SIZE AVAILABLE:

- Long Single 92 x 203cm
- King Single 106 x 203cm
- Long Double 137 x 203cm
- Queen 153 x 203cm

Copper Care High Risk Multi Layered Pressure Reduction Mattress

1st Layer (Top Down):

"Pressure Care" Castellated Copper Infused 5cm Layer of Memory Form.

The castellated design of the top layer provides excellent ventilation through air channels to create a perfect micro-climate. The castellated design also allows for the body to get greater contact point on the mattress surface and therefore reduce the risk of pressure sores and ulcers. The inclusion of the Copper helps to disperse heat away from the body and is tested for higher levels of anti-microbial properties. Essentially keeping the body cooler and reducing the risk of bacterial growth inside the mattress.

2nd Layer:

"Odour Neutralising" 3cm layer of Bamboo Charcoal Open Cell Memory Foam.

The inclusion of the innovative Bamboo Charcoal Infused Memory Foam is to further enhance anti-microbial, moisture absorbing and odour neutralising properties in the mattress.

3rd Layer:

"Customised Pressure Care and Pressure Support" Chambers and Lumbar Zones.

This creates a support layer in the mattress that has softer and firmer shoulder and lumbar zones to enhance the pressure care of the customer. The most technological advanced pressure care mattress in the world also comes with heel chambers to reduce the soreness and sensitivity on a part of a body that is a high risk area for pressure ulcers.

4th Layer: "Durable and High Resilient" rebound foam.

The final layer is designed to keep the spine aligned and not allow for the mattress to sag or drop. Importantly, the mattress is designed to have constant use and comes with a 10-year guarantee.

5. Non-Collapsing Firm Edge Support Walls

"Safe and Secure Self-Transfer" design with firmer section along sides to help prevent falls and aid self-transfers. With the help of our customers, we have designed what many believe is the ideal height and edge support to assist with entering in and out of bed. Extra firm edges with the right balance of comfort and pressure care.

6. Water Resistant Cover with Anti-Leak Protection Seal

Zipable, easy cared, water resistant cover.

Four side handles are designed for carer to move mattress easily. Breathable cooling stretch knit fabric mattress cover is available for replacement.
