

Transfermaster 1000 Lo Lo Adjustable Bed

The Transfermaster 1000 is a full-featured 5 function “ Hi-Care” adjustable bed. The Transfermaster 1000 provides the user and/or caregivers with a complete customisable sleep system that can profile the position of the bed through a risk-free wireless remote.

The Transfermaster 1000 is capable of adjusting bed into the high/low, the head/foot, the trendelenburg/reverse and cardiac chair positions. Excellent for under bed clearance that is perfect for hoist and super low height for easy self-transfer.

The Transfermaster 1000 come with an under bed safety light, 2 customisable memory positions built into a wireless remote and finally has an inbuilt semi-fowler hospital position to help profile the body into the best pressure relief position.

Floor to top deck of the bed frame is 24cm, and raises to a height of 66cm (without mattress). Mattress height: different models vary from 25cm to 30cm.

Profile Adjustment Positions:
